

Barcelona's La Sagrada Familia

A quick weekend girls trip to Barcelona was enough to fall utterly, completely in love with Gaudi's work starting with the still unfinished La Sagrada Familia. Time is of the essence when visiting Gaudi's masterpiece. Take the time to absorb the quiet noise, but don't forget that it's still primarily a house of worship. [Reservations](#) are needed to enter but once inside, you can linger all you wish.

Most valuable tip from locals: Don't miss your ticket time for the main gate nor for a tower visit!

Tip for those with children, vertigo, claustrophobia: If you choose to climb the steps of either of the 2 towers currently open to the public, don't look down. You may also wish to skip stepping out onto a balcony, too. Just saying.

Special thanks to gal pal Ana & my Bella for posing it up for me. Muwahhh!
